

<b>TCN Code</b>	<b>Definition</b>	<b>Description</b>
<b>ACK</b>	Acknowledged Receipt of Message	Record retrieved and stored at PACC/PAAM
<b>BLKORI</b>	Agency ORI Blank	Agency record in ACT database does not include ORI
<b>CMP</b>	Completed Transmission	Record successfully entered in criminal history
<b>COF</b>	CTN on file with different TCN/OCA	CTN already joined to a different TCN/Incident number on CCH
<b>ERR</b>	General Error	Non-Specified error
<b>FMT</b>	Format Error	Incorrect space or character in field – review ALL information in fields on TCN Update screen
<b>INVTCTN</b>	TCN Invalid	TCN entered incorrectly or was not transmitted to MSP by the live scan agency. Verify TCN – if entered correctly have live scan agency transmit record for retention and then re-submit (RSD) through the TCN Update screen
<b>NAM</b>	Arresting agency ORI does not match	TCN/incident number matches record in CHR but with different arresting agency ORI.
<b>NOF</b>	No record on file	Record not matched in criminal history. Verify incident/OCA numbers
<b>RSD</b>	Re-send TCN record	Re-send prosecutor's charging from TCN Update screen
<b>VER</b>	Received verified SID	Received SID from CHR. (Record matched CHR – returned SID)

**COF / NAM** - can only be corrected by MSP

**NOF** – Check first to make sure that the incident numbers (both complaint and print card) are correct

**RSD** – This is used to re-send a record. If anything on the TCN Update screen needs to be edited, use the normal procedure to edit, then click on the TCN Status box and type RSD (if there is anything in the box, delete that first). If there is nothing (no status code) in that TCN status box, you would NOT have to use the RSD to re-send the record, use the normal procedure to submit a record.

**ARO** – Invalid ORI entered. Check arresting agency's ORI to make sure it is a valid and correct ORI number.
